

I was by the Webserver company, I didn't pay that much there and these prices are not on the site, why does it cost me more?

We bill the services at the list prices received from the Webserver, which also includes price increases since acceptance. If one of the DotRoll price packages is suitable, taking into account the utilization of the storage space, you have the option to switch to a DotRoll price package. You can request this from our colleagues by email.
