International domain registration

Questions about international domain registration

- What is the auth code / EPP when transfering international domain names?
- Get an authorization code to transfer my domain to another registrar
- International domain name registration
- International domain name transfer
- .eu registration

What is the auth code / EPP when transfering international domain names?

The AUTH (or EPP) code is for your security. If you wish to transfer your domain, you will get this code via e-mail. Without this, your domain cannot be transferred.

Get an authorization code to transfer my domain to another registrar

If you want to transfer your domain to another company, the other company may ask for an authorization code (also known as EPP codes) to verify that you own the domain name.

> If you need an authorization code to transfer a domain to DotRoll instead, see **What is the auth code / EPP when transfering international domain names?**

TO GET AN AUTHORIZATION CODE

1. Log in the **DotRoll administrative** interface.
2. Click the **Domains** / **My Domains** menu, then click the **Manage Domain** button.
3. Choose the **Management Tools** / **Get EPP Code** item in the domain information page.
4. Our system will display the code of the authorization for the domain name.

International domain name registration

DOCUMENTS

For ordering an international domain name, you don't need to sign or upload any documents.

REGISTERING YOUR DOMAIN

1. Register on DotRoll.com

2. Order your domain name

3. Payment. You may proceed via credit/debit card or via wire transfer. You may transfer money from any account, but you have to mark your domain name in question.

4. Your domain name will be created and is usable in just a few minutes.

5. The administrative contact (Admin-C) will be notified via e-mail. Your electronic invoice will be created and may be downloaded from our system.

6. You may freely configure your domain name using our system.

International domain name transfer

After registering a new domain or modify the domain contact data, it is locked for 60 days. Can not be transferred!

Domain transfers are done using the administrative contact's e-mail address. Before starting, please verify the e-mail address exists and is accessible. You may check the whois record of your domain using the following site: http://www.internic.net/whois.html

1. Ask your current registrar to release the domain lock.
2. Ask your current registrar for the domain's "auth code". In most cases, this is a 4-16 character code needed for the domain transfer.
3. Create an account in our system.
4. Order the domain transfer using our system.
5. Payment. You must proceed with your payment during the 14 day waiting period. You may do so via credit/debit card or via wire transfer. You may transfer money from any account, but you have to mark your domain name in question.
6. As soon as the payment arrives, the transfer commences. You will receive an e-mail to your old administrative contact's mailbox. You have to click contained therein and authorize the transaction. If you fail to do so within 15 days, the transfer will be cancelled.
7. The administrative contact (Admin-C) will be notified via e-mail. Your electronic invoice will be created and may be downloaded from our system.
8. You may freely configure your domain name using our system.

SUMMARY

1. Release the domain lock.
2. Acquire the domain lock.
3. Order the domain transfer.
4. Commence with payment.
5. Authorize the transfer by clicking the link in the e-mail sent to your AdminC e-mail address.

.eu registration
