

# How to Get an Authorization (EPP) Code for Domain Transfer

If you want to transfer your domain to another company, the other company may ask for an authorization code (also known as EPP codes) to verify that you own the domain name.

If you need an authorization code to transfer a domain to DotRoll instead, see [What is the auth code / EPP when transferring international domain names?](#)

## TO GET AN AUTHORIZATION CODE

1. Log in the **DotRoll administrative** interface.
2. Click the **Domains / My Domains** menu, then click the **Manage Domain** button.
3. Choose the **Management Tools / Get EPP Code** item in the domain information page.
4. Our system will display the code of the authorization for the domain name.
