Cookie Consent

This guide will help you with How to Add Cookie Consent to your website.

LOGIN IN TO CONTROL PANEL

Firstly Login to your Control Panel (e.g. cPanel's URL will be <https://domain.com:2083>) and log in with your details. There click on the SitePad Icon or Link.

Image not found or type unknown

You will be redirected to **SitePad Website Builder**.

SELECT COOKIE CONSENT OPTION

Once you are redirected to **SitePad Dashboard** Hover your mouse on **Settings** which will show submenu list, select **Cookie Consent** from the given list.

Image not found or type unknown

TURN ON COOKIE CONSENT

In **Cookie Consent** you will need to turn Cookie Consent On, after that you can set different options for your Cookie Consent.

Image not found or type unknown

- - Select **Banner Position**
 - Select **Banner Layout**
 - Select **Banner Color** where you can set **Banner** and **Button** color.

Image not found or type unknown

- ◦ Add your own **Privacy Policy link**.
- Customize the banner with your own **Cookie Consent Message, Dismiss Button Text** and **Policy Link Text**.

Once you've finished customizing you need to click on **Save**.

Changes can be viewed on the **Preview website**. Once you've finalized the changes then click on **Publish**

Add Email Template

This guide helps when you are using more than one Contact Form in your Website.

CONTACT FORM

1. Insert **Field-Name** , this **Field-Name** you will use in **contact-form-id** Textarea box of contact settings page.

Image not found or type unknown

2. Insert **Form Id** , this **Form Id** you will use in **contact-form-id** Textbox box of contact settings page.

Image not found or type unknown

CONTACT SETTINGS PAGE

1. Go to SitePad **Settings** Menu in that click on **Contact Form** submenu. You can see the image shown below.

Image not found or type unknown

2. Now insert **contact-form id** which you inserted in contact form when you designed. And click on **Add Template** button.

Image not found or type unknown

3. When you click on **Add Template** button and click on **Save** button then you will see image as shown below.

Image not found or type unknown

4. Enter Email address in **To** and **From** input box to a particular user for sending the details of a particular form. Textarea box you can see, in that you insert your **Field-Name** along with square bracket one-by-one. Click **Remove** button for removing the **contact-form-id** along-with all the details such as To, From, Subject and fieldname Textarea box. After all changes, click on **Save** button.

Configure SMTP/PHP Mail

How to Configure Contact Form with SMTP/PHP Mail

This tutorial will show you How to Configure your **Contact Form Setting** to allow **SMTP/PHP Mail** to send Email from **Contact Form**.

SELECT CONTACT FORM SETTING

PHP Mail function uses your **localhost** to send Email from Contact Form while **SMTP Mail** function uses a **Server** to send Email from your Contact Form. You can configure the Contact Form Settings at **SitePad Dashboard > Settings > Contact Form**.

Image not found or type unknown

PHP MAIL

- PHP Mail is selected as a default option.
- You will need to add the same Email-Id in **To** and **From**, enter multiple email address with comma-separated if you want to send multiple recipients.
- You can add enter the format in **Subject** if you need Dynamic Subject.
- You can change **Success/Fail Message**.
- You can add **reCAPTCHA** if you want to avoid spam from your Contact Form.

Image not found or type unknown

Click on **Save Button** once you fill the Setting.

Note: If your host does not allow sending mail using local server then you will need to **Configure SMTP Mail**.

SMTP MAIL

To Configure SMTP Mail you will need a **Gmail/Yahoo/Hotmail** account or you can use your **Webmail account** with all the SMTP settings provided by your Host in your control panel.

You will need to select the **SMTP Mail** from the drop-down list in **Mailing Method**.

- Add **SMTP Server** (in-case you are using secure server port then please add ssl:// before the server domain i.e ssl://domain.com).
- Add **SMTP Port**
- Add **SMTP Username** (i.e Email Id)
- Add **SMTP Password** (i.e Email Id Password)
- You can also configure settings same as mentioned above in PHP Mail i.e change Subject, change Success/Fail Message, Add reCAPTCHA to avoid spam.

Image not found or type unknown

Click on **Save Button** once you fill the Setting.

Publish Site

Once you have done with your **Theme Editing** and want to **Publish** your **Site** you can follow this guide.

1. Go to your **Dashboard** and click on **Publish** button present at the **Top of Dashboard** as shown in the image below.

Note: It is not necessary to always go to **Dashboard** for Publishing your Site. You can click on **Publish** button anywhere inside your **Dashboard** or **Page Editor** and follow below steps.

Image not found or type unknown

- Step 1 will popup the **Confirmation Window** as shown in image below. Press **Yes, Publish** button to publish your site and if you want to stop process then press **Close** button as shown in image below.

Image not found or type unknown

- Then **Wait** for the **Process to Complete**.

Image not found or type unknown

2. After the completion of process you will see the window as shown in image below. Click on **Visit website** button to see your **Published Site**.

Note: You can also **View** your **Published website** by **Clicking** on **Site URL** as shown in image below.

SCRIPT OUTPUT ON SELECTED PAGE

If you want to show MailChimp script output on a particular page then click on **Selected** option, Choose particular page from dropdown and add mailchimp code in a textarea box, click on Save Changes button.

Image not found or type unknown

Switch Site

Note: To Switch Site you need at-least two sites to be in your SitePad Builder

If you have a Single Site and have not added any other Site and want to Add New Site then you can follow the documentation mentioned: [Add New Site](#)

SWITCH SITE

To Switch from Current Site to any other Site that you want to work on again. All you need to do is hover on **Switch Site** on Navigation Bar.

You will find the list of all the Sites that you have added. Now Click on the Site you wanted to work again and then click on Dashboard like shown in the image below.

Image not found or type unknown

Also remember the Site that was created by SitePad when you logged in first time will always be on top of the Switch Site.

Google Analytics

Google Analytics is a web analytics service offered by Google that tracks and reports website traffic.

For this, you will need tracking ID which can be found after creating an account at [Google Analytics](#)

You can check out the tutorial given by Google Analytic Team on [Getting Started with Analytics](#)

LOGIN IN TO CONTROL PANEL

Firstly Login to your Control Panel (e.g. cPanel's URL will be <https://domain.com:2083>) and log in with your details. There click on the SitePad Icon or Link.

Image not found or type unknown

You will be redirected to **SitePad Website Builder**.

GO TO GOOGLE ANALYTICS

Once you are redirected to **SitePad**. You will need to hover on Settings and then select **Google Analytics**.

Image not found or type unknown

You will be redirected to **Google Analytics** setting page. There you will need to enter the **tracking ID** provided by Google Analytics after adding your account.

Image not found or type unknown

After entering all the details as mentioned above click on **Save Button** to save changes that you've made.

After this when you edit your Site and Publish it. You will be able to track your website traffic from [Google Analytics](#).

You can check out the documentation given by Google Team on [How to Check Your Web Stats](#)

Website Builder Assistant

SitePad Assistant is a tool which helps you navigate **SitePad Editor**.

HOW TO USE SITEPAD ASSISTANT

When you login for the **first** time **SitePad Website Builder** will enable the **Assistant** by default.

You need to Click on **Get Started** to navigate SitePad Editor. If you want to **Disable** the Assistant you just need to click on Close or X as shown in the Image below:

Image not found or type unknown

ENABLE ASSISTANT

You can always Enable it back again by hovering on **Welcome, {username}** on the **Navigation Bar**. You will see a Drop Down List which mentions **Enable Assistant**.

Click on the button and **SitePad Assistant** will be enabled for you.

Image not found or type unknown

DISABLE ASSISTANT

To **Disable** the Assistant you need to follow the **same procedure** that you followed to Enable the Assistant. But instead of Enable button you will see **Disable Assistant** button.

Click on the button and **SitePad Assistant** will be disabled for you.
