

# Add Categories to Blog Post

In this tutorial, we will show you How to **Add Categories to Blog Post**.

For Adding Categories to your Blog Post you will need to access **SitePad Editor**.

## GO TO SITEPAD EDITOR

From your Control Panel click on **SitePad Website Builder**. You will be redirected to SitePad Editor Server.

Image not found or type unknown

Once you are redirected to the Editor Server you will see **Blog** in the Main menu. Click on **All Posts** and then click on **Edit Icon** to edit the Post. You will be redirected to the Editor.

## MORE OPTION AND CATEGORIES BUTTON

In **Editor**, you will need to hover the mouse on **More** then select **Categories Button**.

Image not found or type unknown

A dialog box will appear in which you can add a **New Category** as shown in the image below or you can select from different Categories already added.

## PREVIEW CHANGES

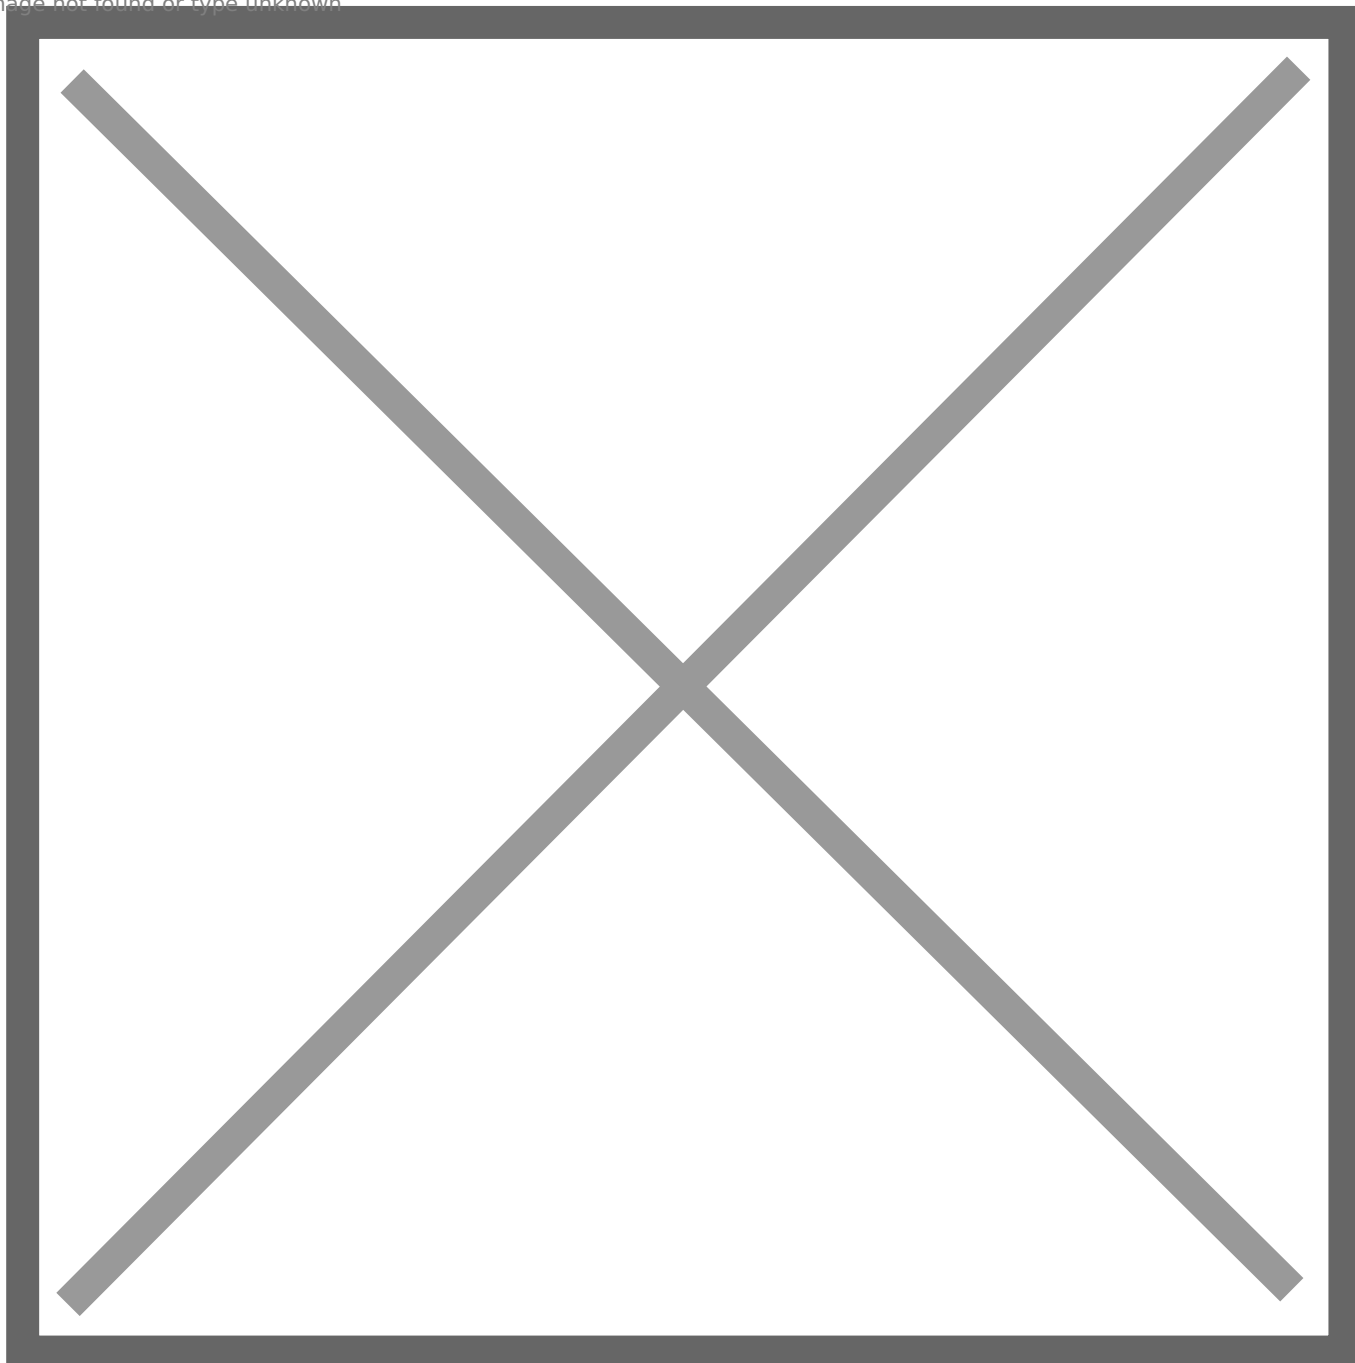

After assigning categories to the post, on preview, your post would look like the image given below:

Image not found or type unknown

Also if you assign a **single category** to more than one post and when you click on that **category name** it will show all the blog post assigned to that category as shown in the image below:
