

# Add New Site

This guide will show you how to Add New Site.

## LOGIN IN TO CONTROL PANEL

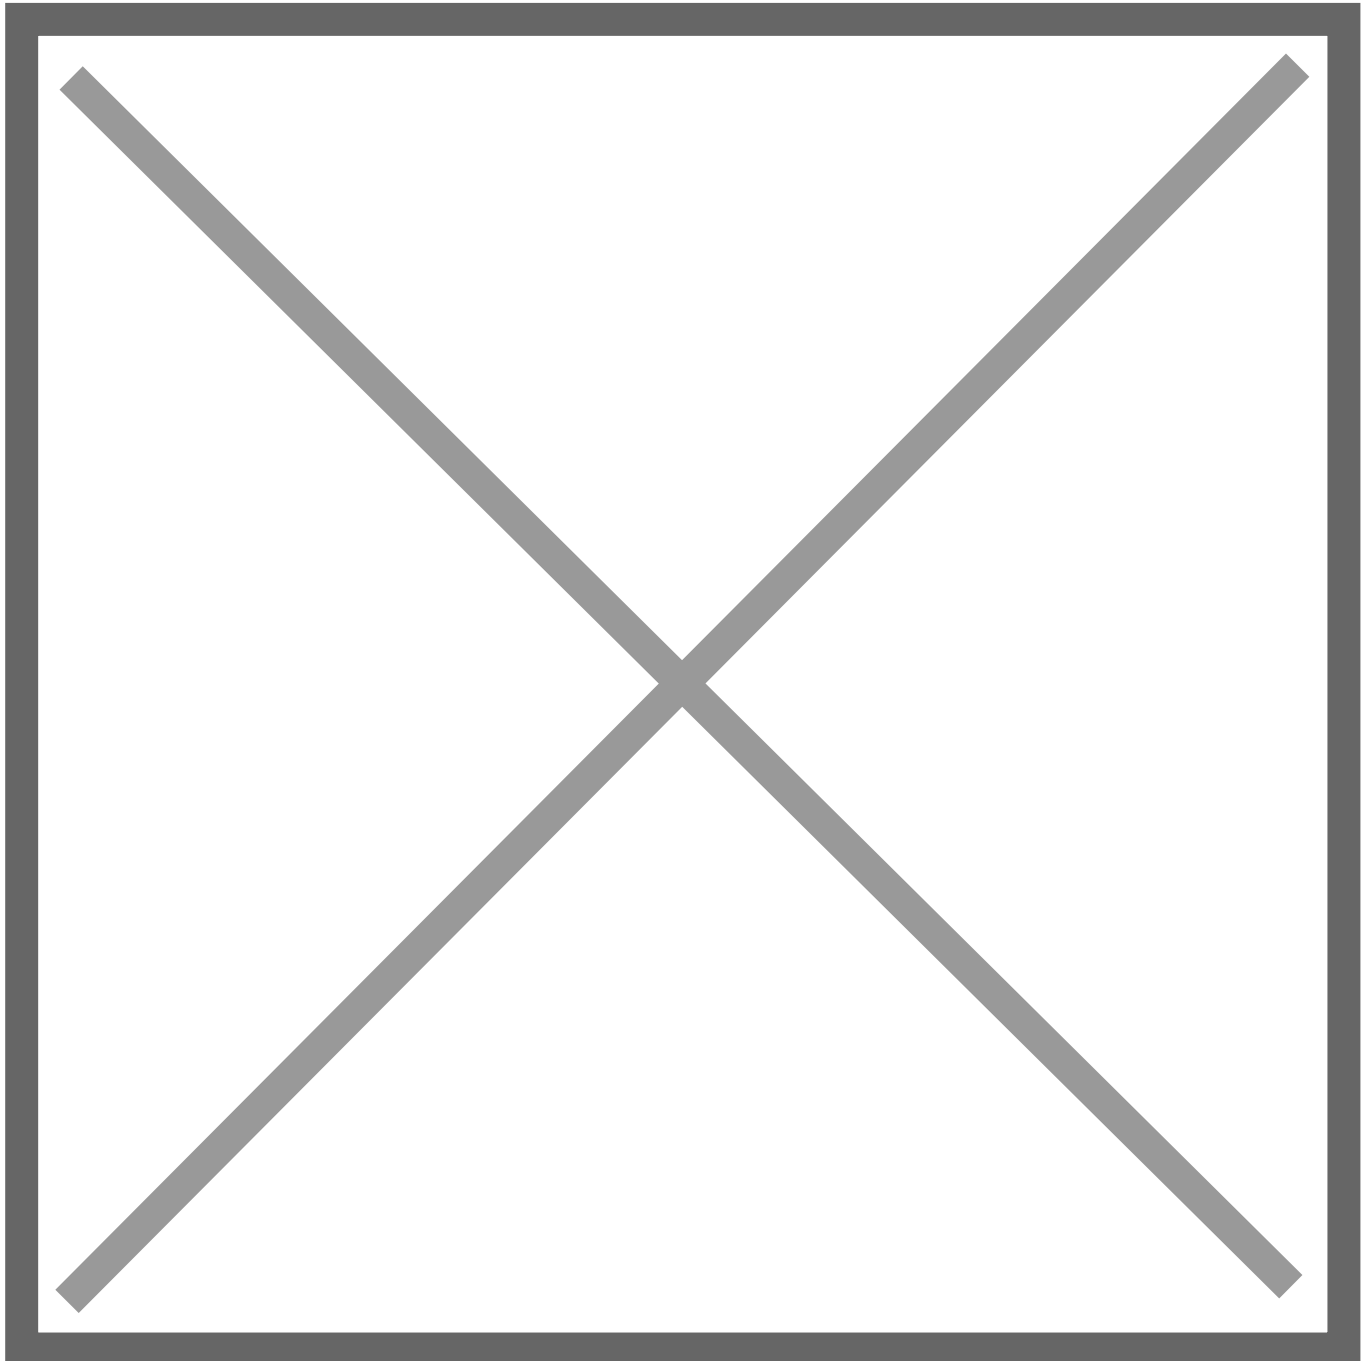

Firstly Login to your Control Panel (e.g. cPanel's url will be <https://domain.com:2083>) and login with your details. There click on the SitePad Icon or Link.

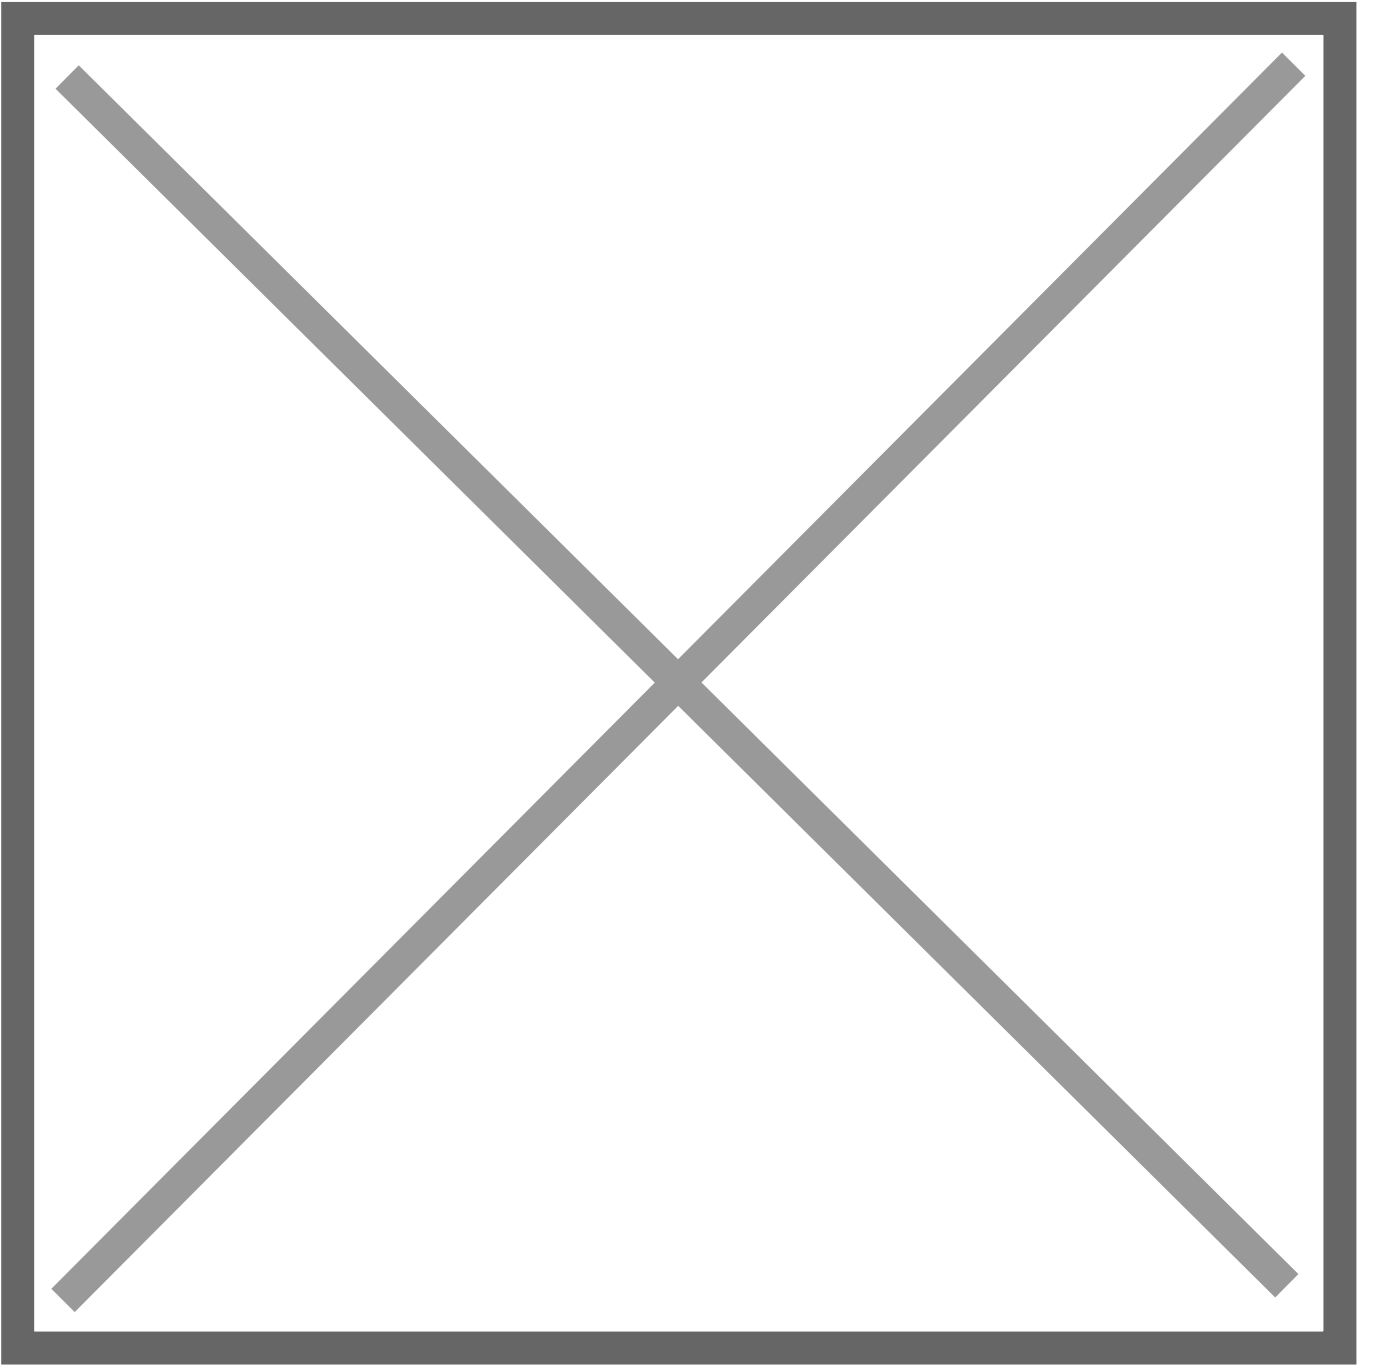

You will be redirected to **Website Builder**.

## ADD NEW SITE

Once you are on SitePad Website Builder dashboard. You will see **Sites** option on Sidebar Navigation Menu.

Click on **Sites** and then Click on **Add New Site**.

Now you will see all the options regarding adding new sites.

Add **New Site Name** for website to be shown on switch site. Then enter the New **Site Address** (select from your domains) and then add new directory. Next you need to Enter **Site Title**. You can also change the language of your new site and select it to your native language. Also if you want you can also add new admin email.

Once the website is added Successfully you will see the success message asking you to visit **Dashboard** of the new site or **Edit** newly created Site.
