Button

This Guide will Help you to edit Button Widget Settings and Style.

BUTTON WIDGET SETTINGS

When you **Drag and Drop** Button Widget in SitePad Website Builder Dashboard. You will see **Button Settings and Style** in Button Widget. Go to Button Settings. You will see the image like below. You can change the **Button Text** and **Button Link** and after that one checkbox is there, if you check this checkbox you can **open** that link in **another window**.

If you want to display **Icon** under the **Button** then click the Icon, Choose particular Icon from a list.

If you want the Button in **full width style** then check the checkbox of **Stretch**, and **Alignment** Settings gives you Button Alignment.
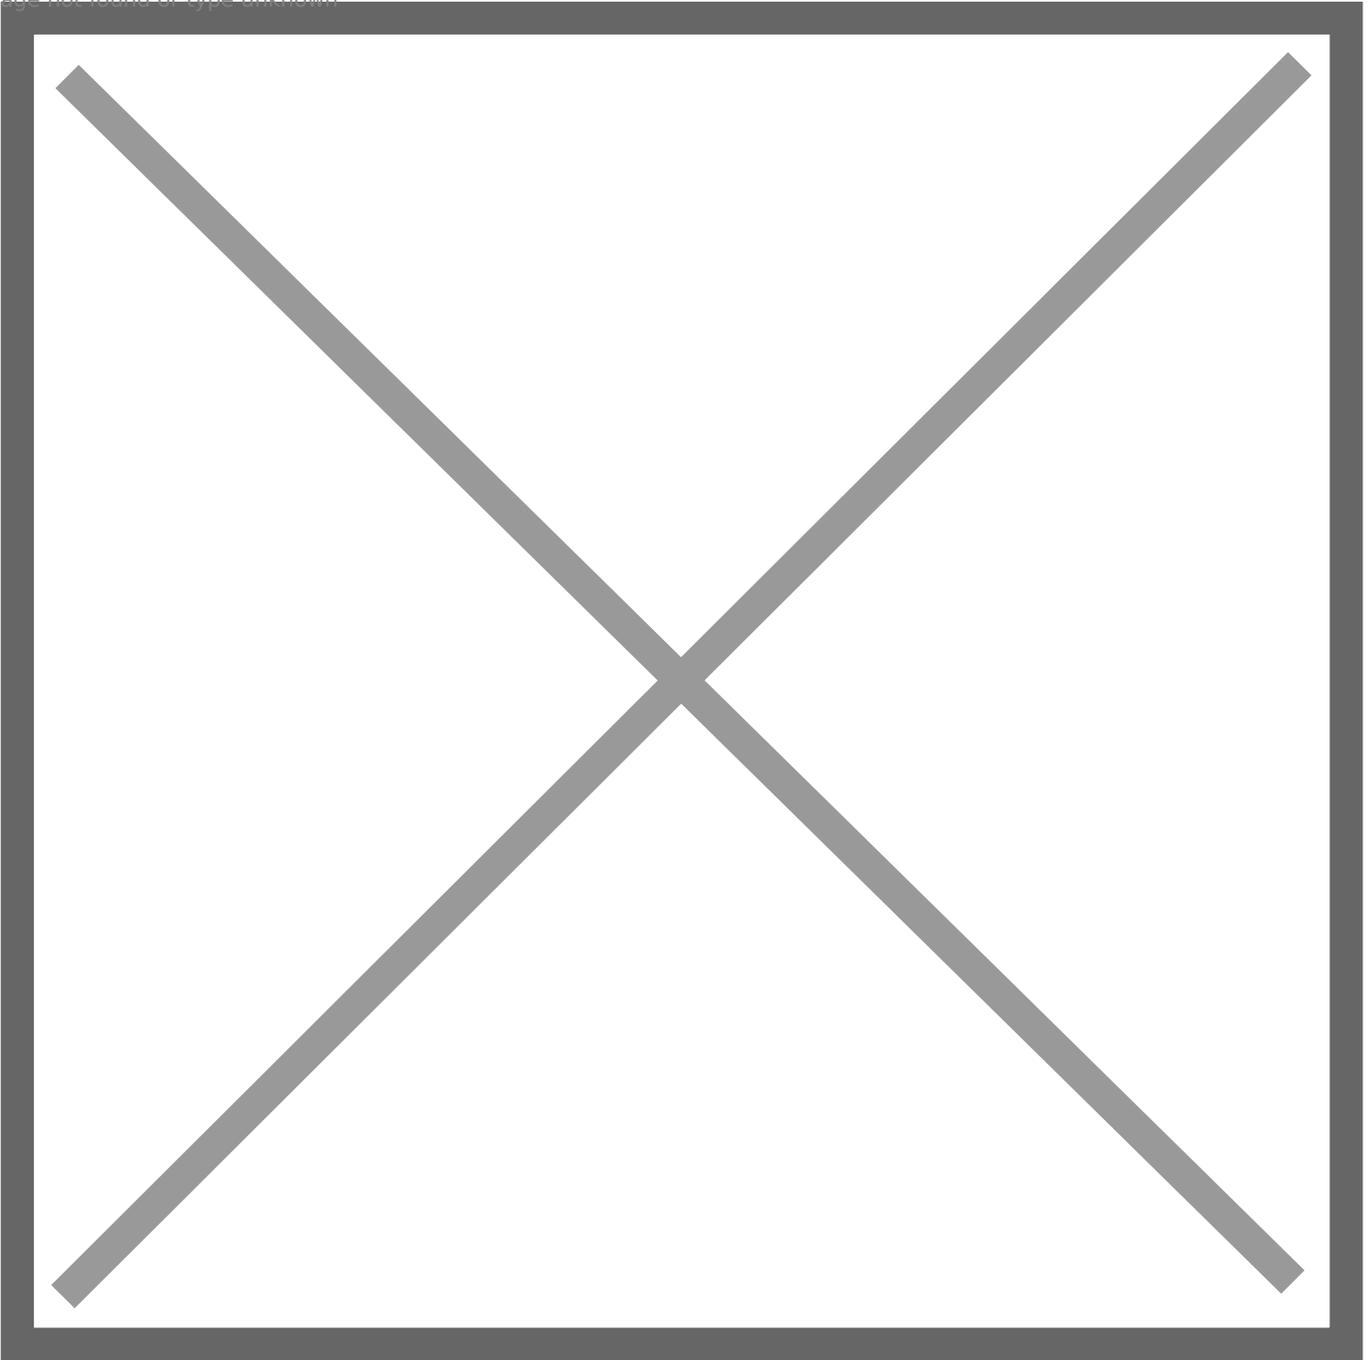

LINK BUTTON TO THEME PAGES

To link you **Button** to existing theme page just click on three dots of Link section as shown in image below.
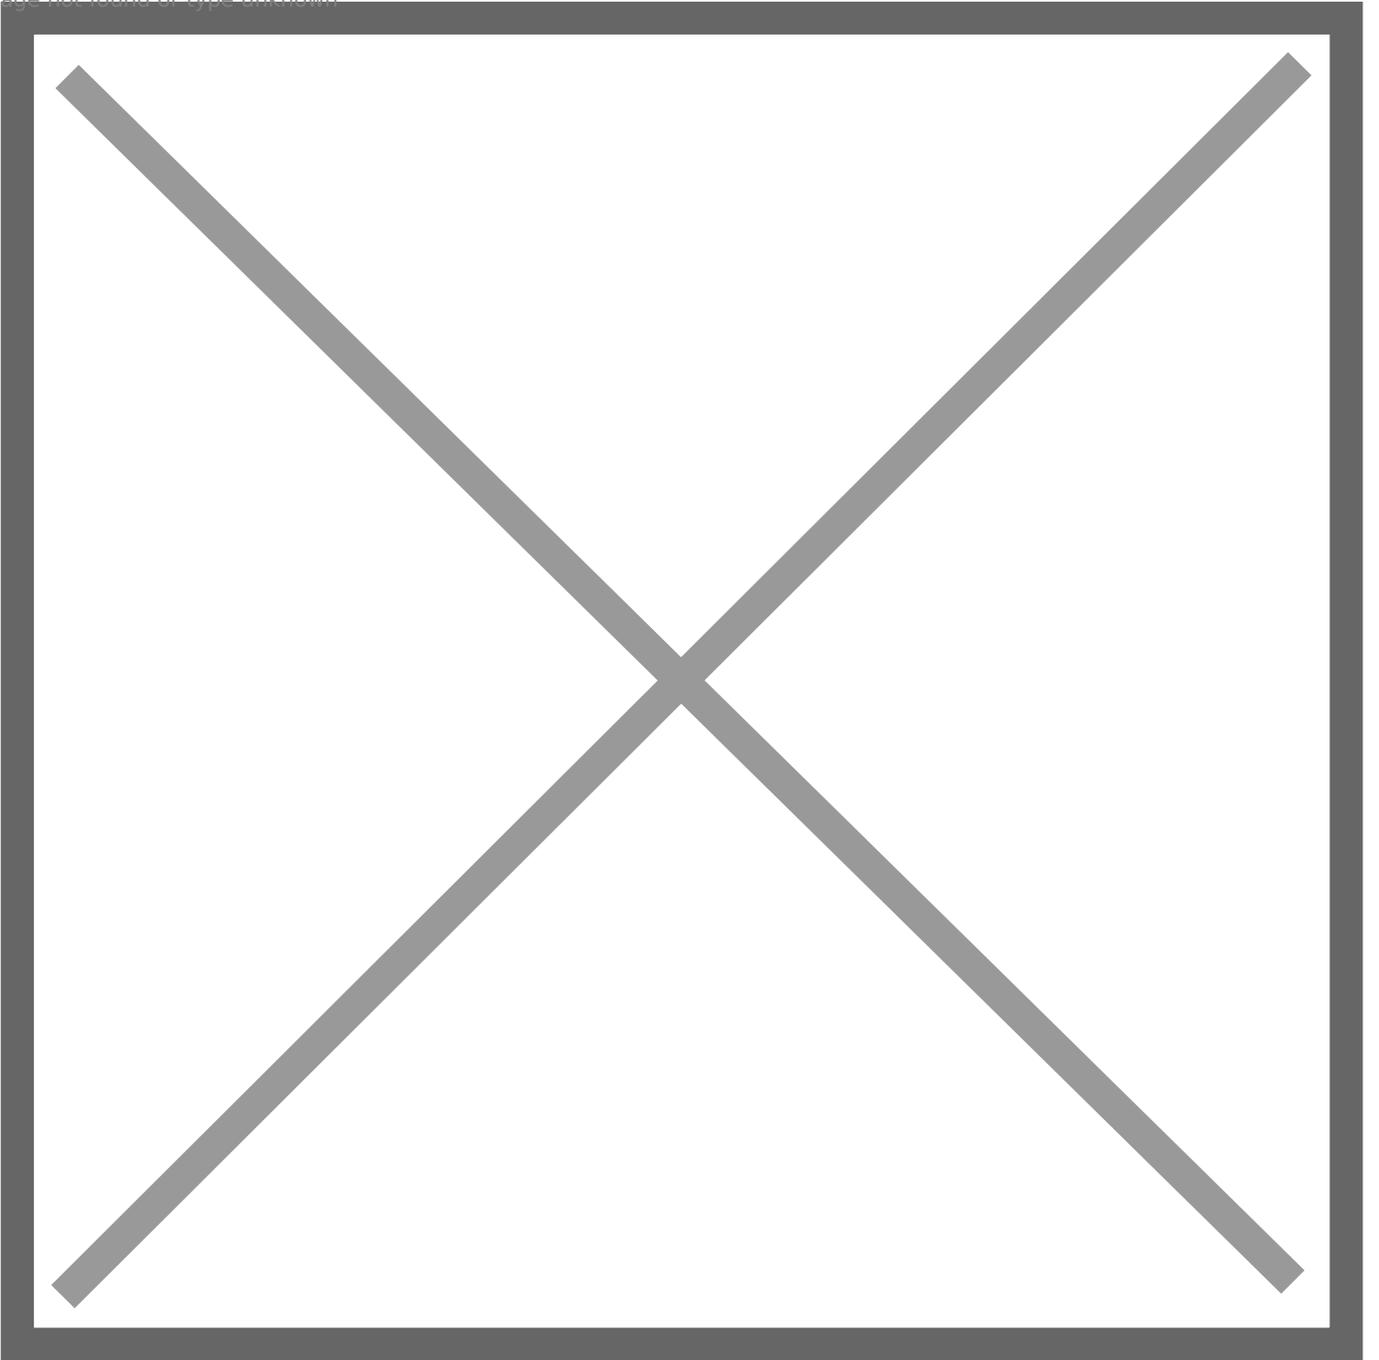

Now in popup box click on **Arrow**.
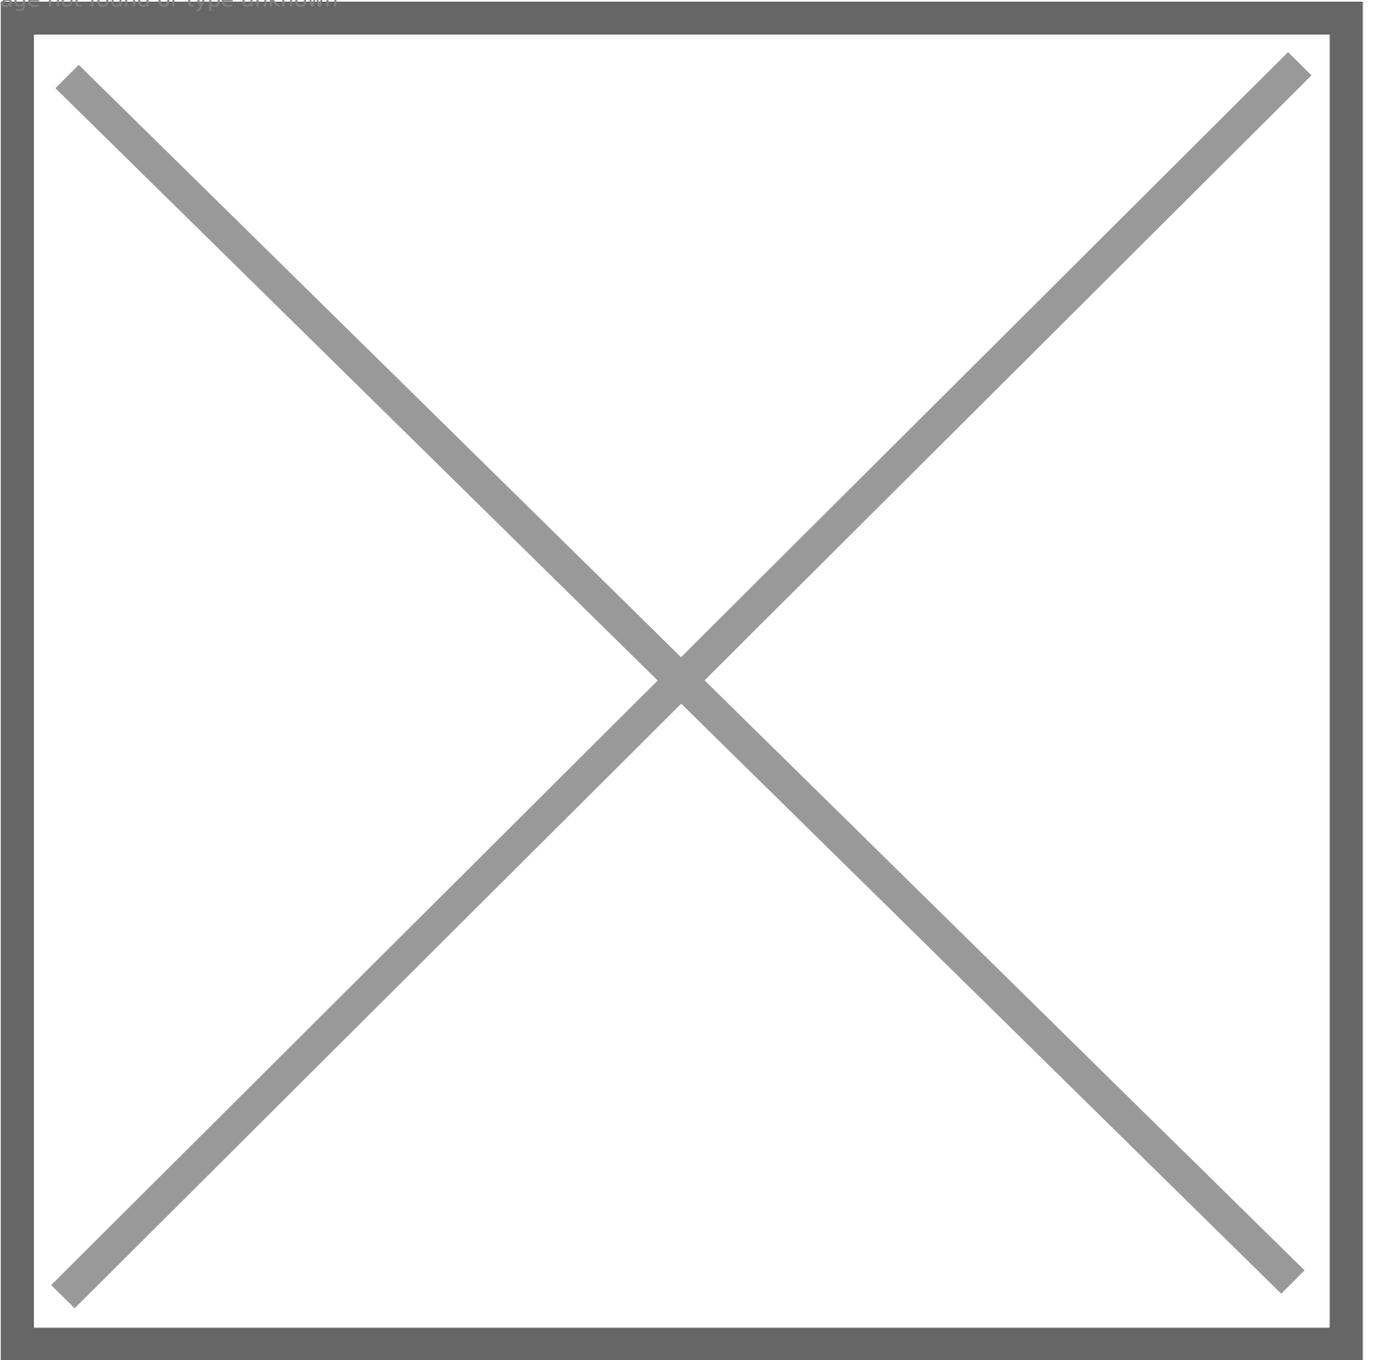

Select page which you want to link and in the end click on **Add Link**.
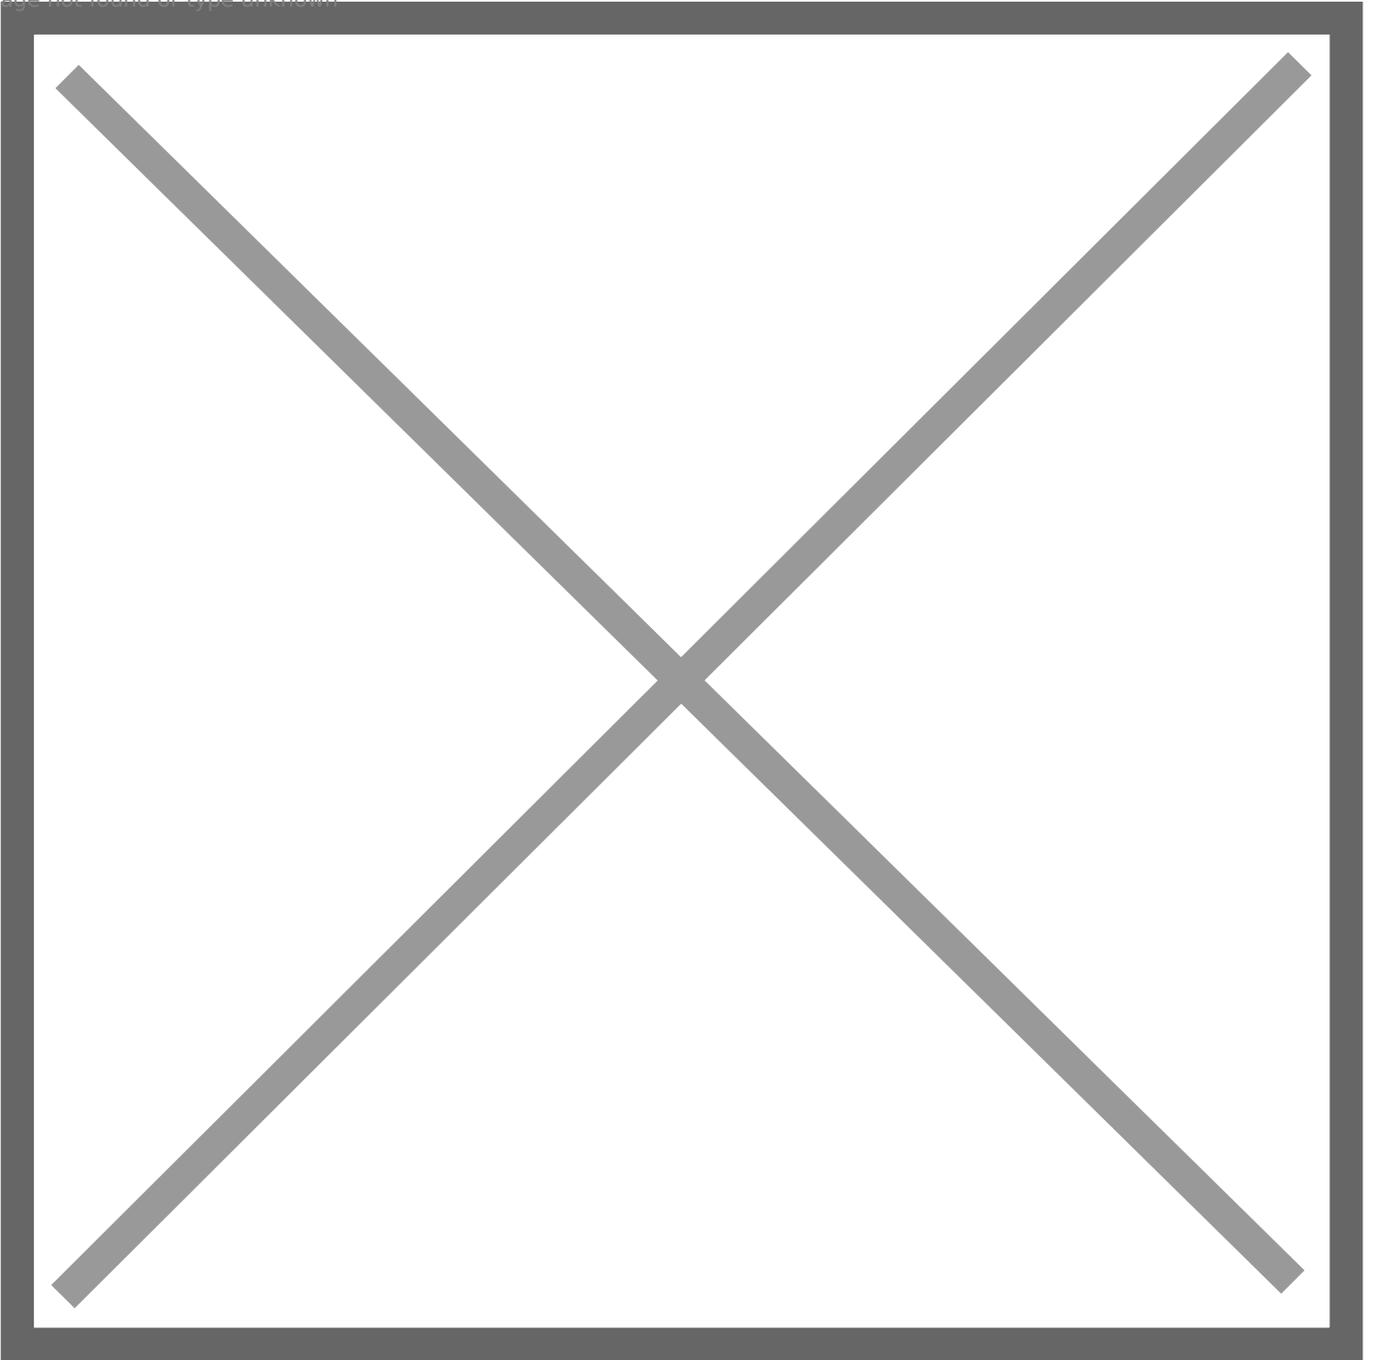

EDIT BUTTON ELEMENT STYLES AND PRESETS

If you want to change the **Button Custom Styles** like Background color, Text color etc. then click **Edit Element Style**.

For **Predefined styles** which comes in **widget** like Background color and Text color then you can click **Predefined Styles**.
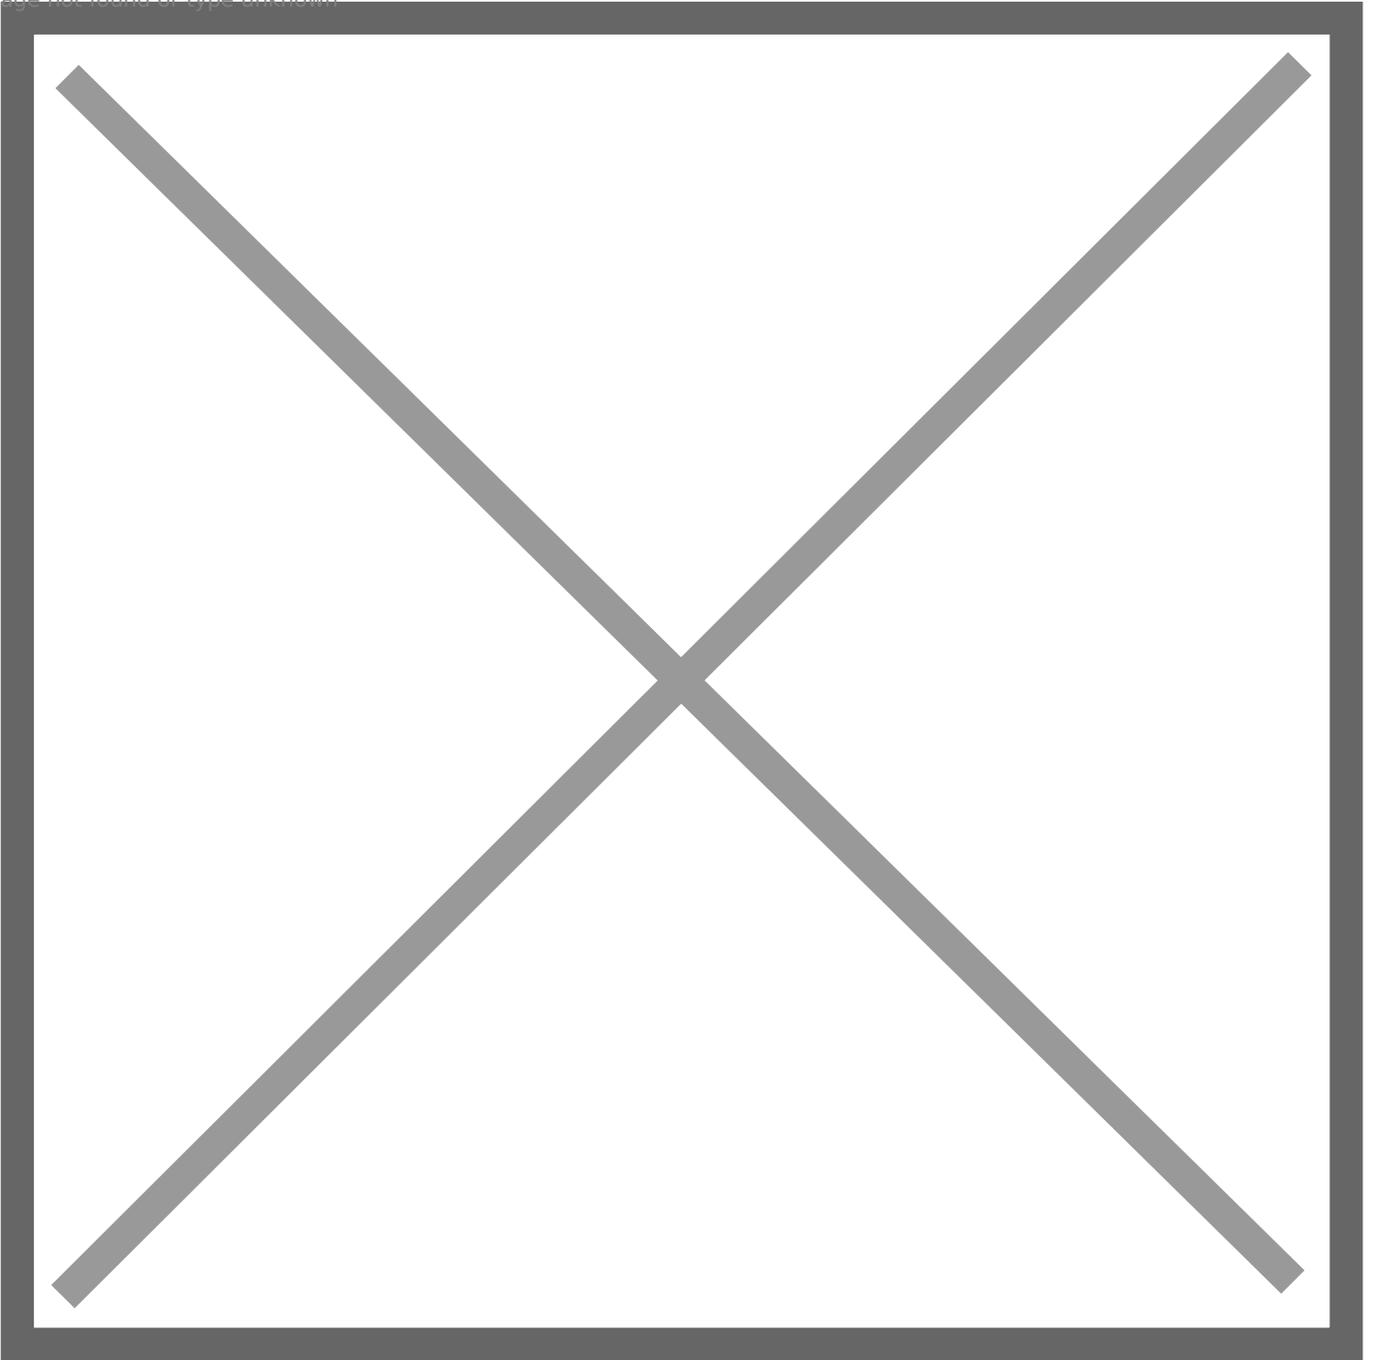

BUTTON CUSTOM STYLE

Button Custom Styles gives you to change Button Background color, Text color, Padding, Border-radius etc. When all are set then click on **Apply** button.
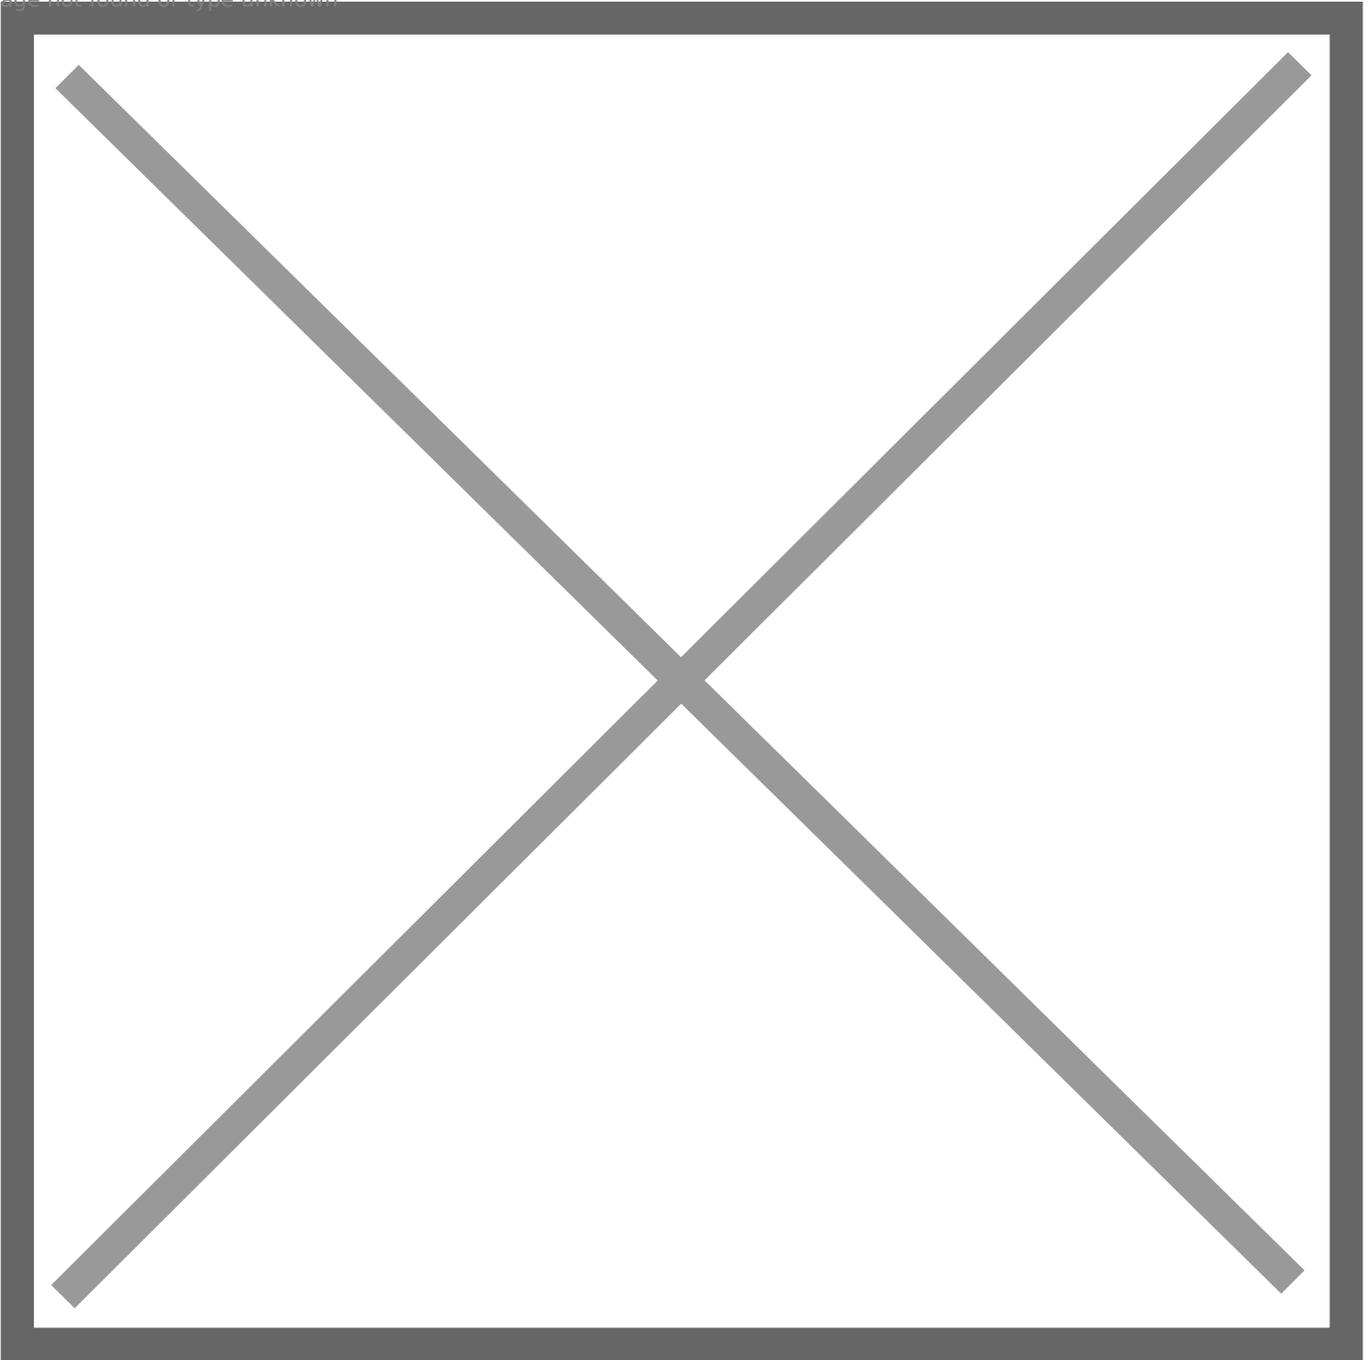

BUTTON PREDEFINED STYLE

Predefined style gives you **clasees** of various predefined button for Background and Text color. And Size gives you various types of **Button Size**.
