

How to Clone a Site

This guide will show you how to Clone a Site.

CLONE A SITE

Click the **Sites** to display all the site that you have created from SitePad Dashboard.

Once you see all Sites. Click on the **Clone Icon** of the site that you want to clone or you can click on **Clone Site** as shown in the image below.

When you click on **Clone Icon** you will see all the options regarding the cloning.

Select the site from **source site** dropdown list and Add **New Site Name** for website. Then enter the New **Site Address** (select from your domains) and then add new directory. Next you need to Enter **Site Title**. You can also change the language of your clone site and select it to your native language.

Once the website is cloned Successfully you will see the success message asking you to **Visit Dashboard** of the clone site or **Edit** newly created clone site.
