# Insert Custom HTML

This documentation will guide you on How to Insert Custom HTML code.

GO TO EDITOR

When on **SitePad Website Builder** Dashboard. Hover on **Pages** option given on the left sidebar and then click on **All Pages**. Once on all Pages Click on **Edit Icon** of Any Page.
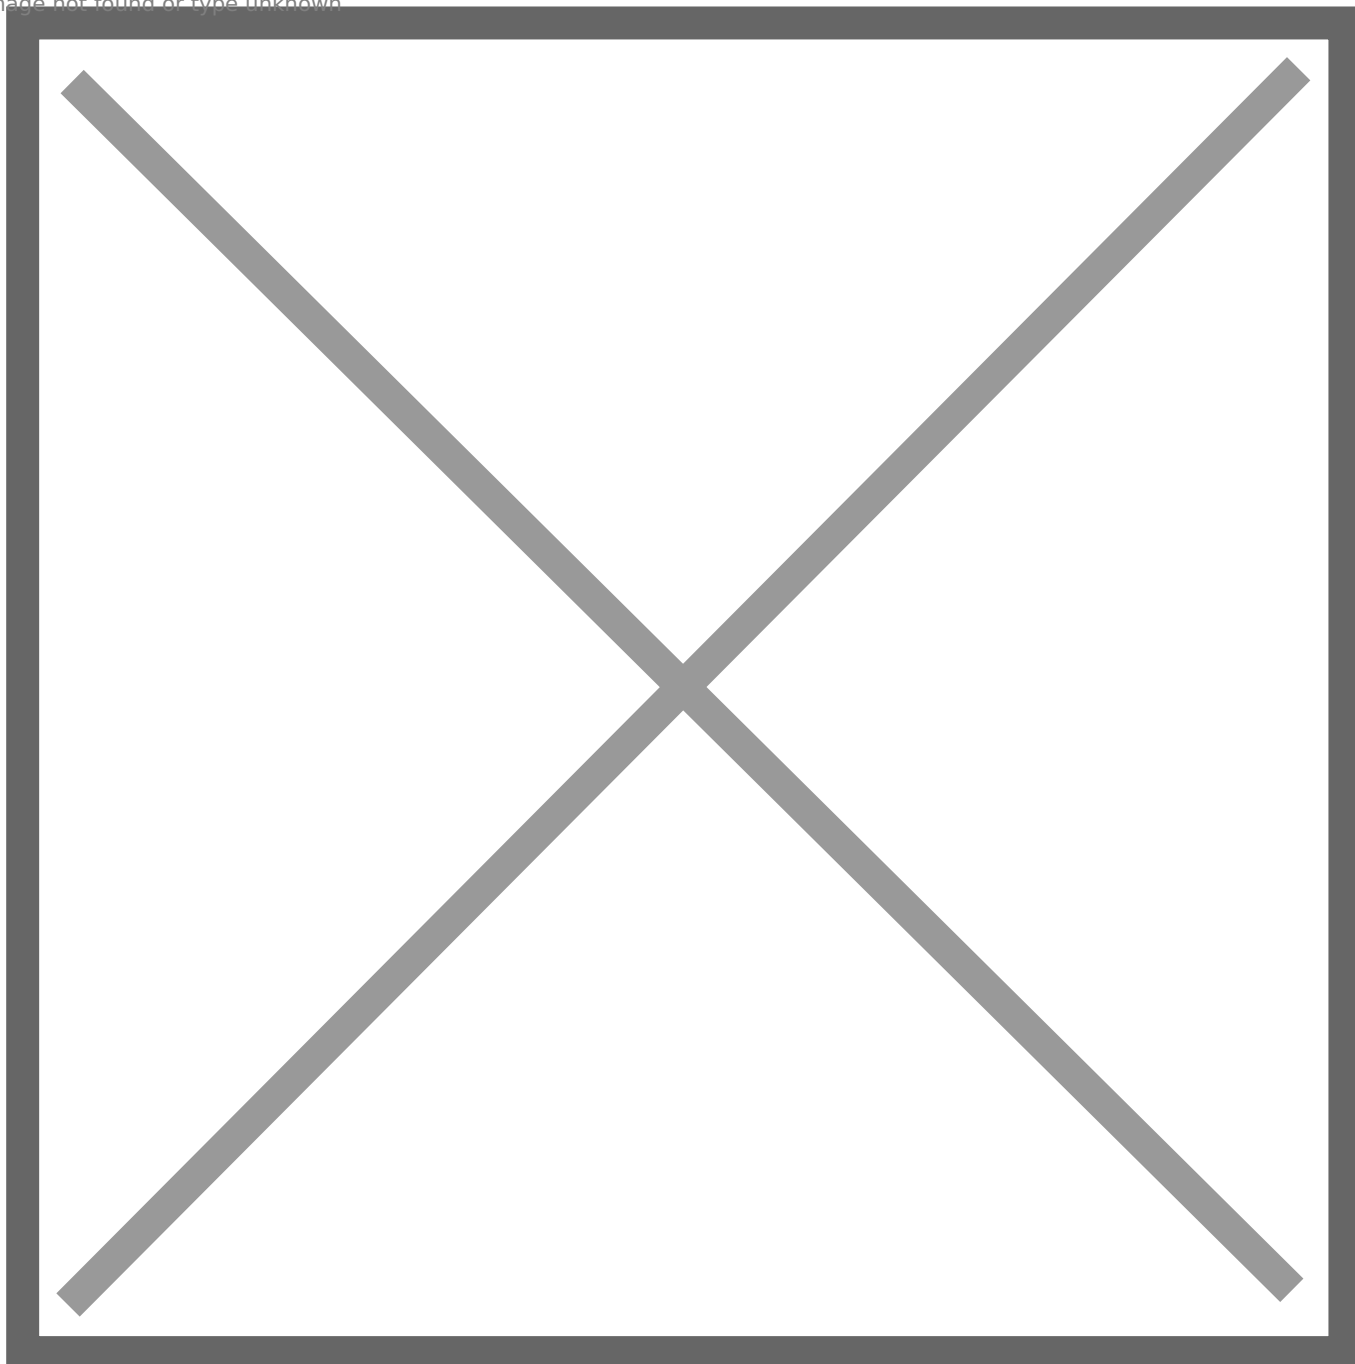

Image not found or type unknown

You will be redirected to Editor.

SELECT CUSTOM HTML

On **SitePad Editor** hover on more menu on the navigation bar. When you hover on more menu three buttons will be drop down **i.e** Reset Page, SEO Options and Custom HTML.
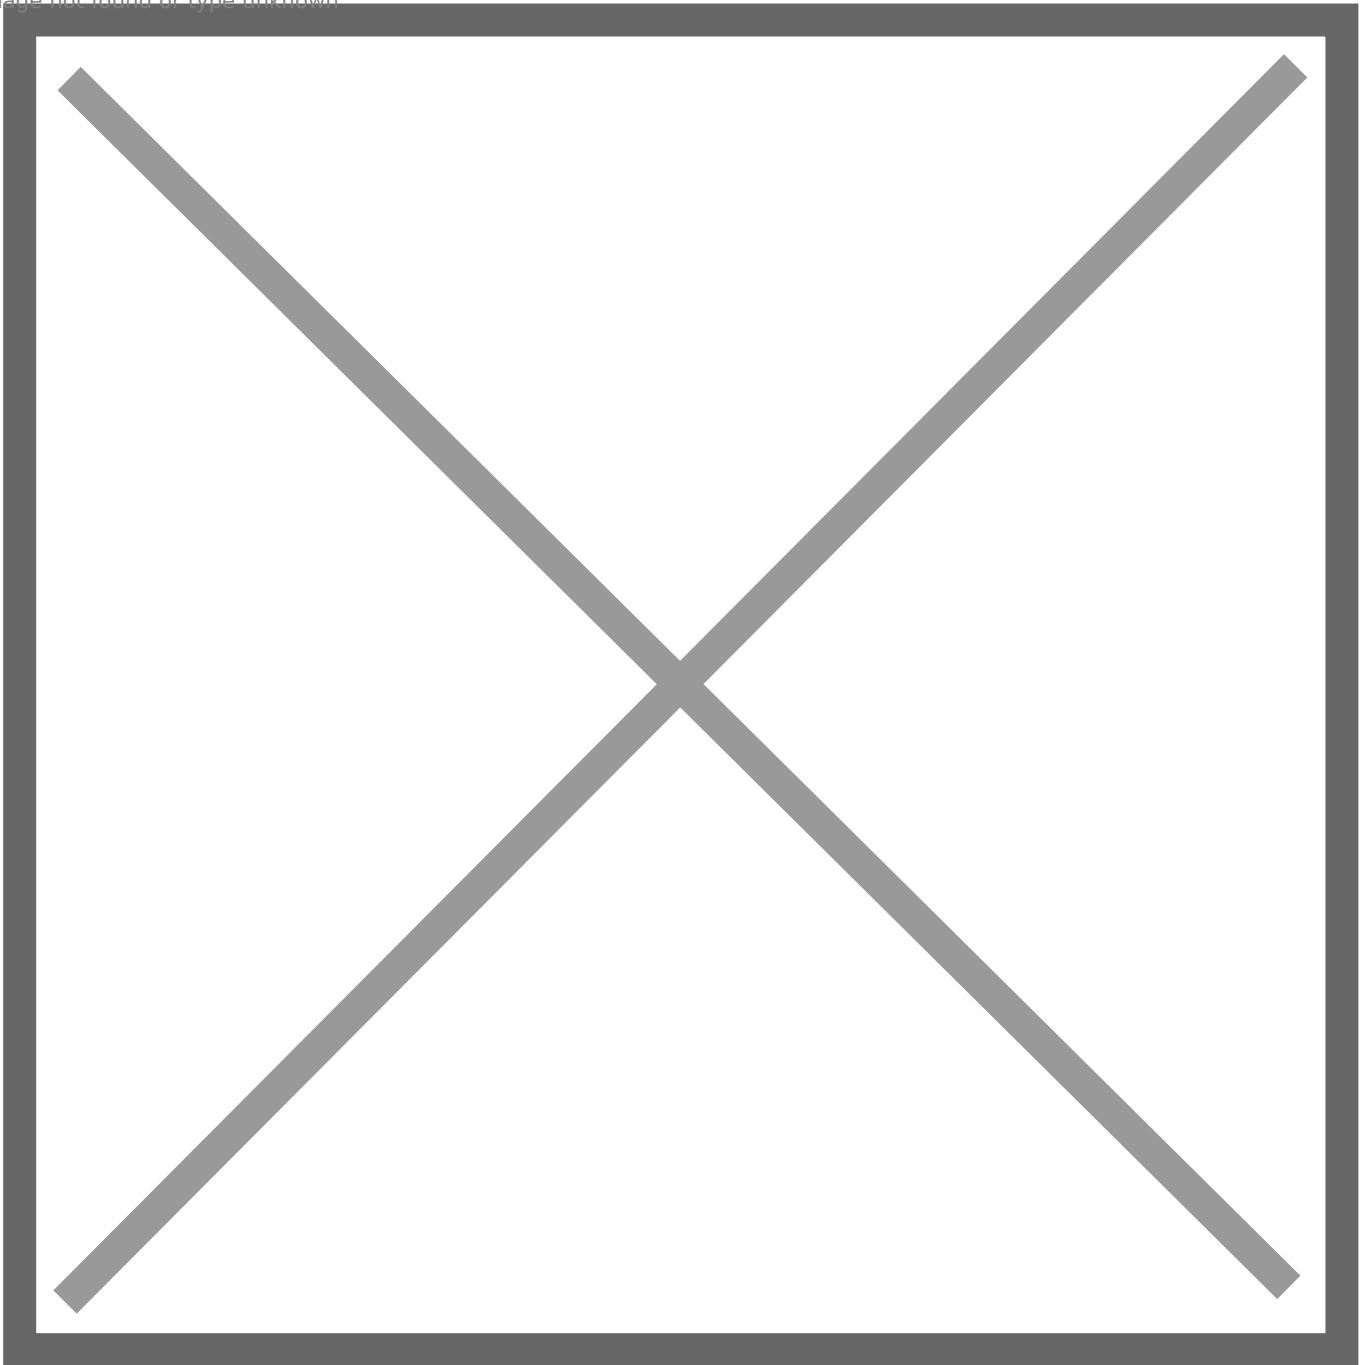

Click on **Custom HTML**.

INSERT CUSTOM HTML FOR HEADER

On clicking **Custom HTML** you will see a dialog box will appear. Insert Custom HTML code for Header in the given textarea.

Once you have made the changes then click on **Save** to save the Custom HTML.
